

## **TARA IT – Frequently Asked Questions (FAQ)**

### **What makes TARA IT different from other programs?**

You'll work on building actual products and software, not just learning theory.

### **What support is provided for job placement?**

We will connect you with relevant job opportunities through our network.

### **What additional skills will I gain from TARA IT?**

You'll also develop leadership, design technologies and project management skills.

### **Do I need to know programming before joining?**

Basic programming knowledge from your undergraduate program is enough to get started.

### **Do I need a laptop to participate?**

Yes, a personal laptop is required for coursework and projects.

### **What are the class timings and format?**

Classes are held online during the evenings, with occasional in-person sessions.

### **Will the sessions be conducted in English?**

Yes, instruction will be in simple English, and we're happy to support in Tamil or other local languages if needed.

### **What are the eligibility criteria?**

The program is open to final-year students pursuing degrees in computer science, IT, computer applications, or engineering.

### **How much is the course fee?**

The fee is posted on the application form. Payment is required only after selection.

### **What is the duration of the course?**

TARA IT is a 4-month-long immersive training experience.

### **Who are the mentors for this course?**

You'll be guided by a global team of educators and tech professionals with real-world experience. See our faculty page.
